WeatherPro Valve & Flange Jackets Material Specifications

The WeatherPro valve jacket range is designed for external use on LTHW, domestic Services and chilled water systems. The jackets weather resistant layer ensures the thermal properties of the jacket are kept through its lift time. The water and mould resistant outer covering keeps the jacket from degrading aesthetically in the harshest of weather conditions.

1. FR-PU Coated Cloth Outer Jacket (3 Colours)
2. Water Proof Membrane
3. 50mm Glass Fibre Insulation Fill
4. Polyester Draw Cord
